FULL-STACK DEVELOPER

Graduated from EPSI, a computer engineering school, with significant experience (6+ years) as a freelancer, in work-study programs, and in startups. I also work for many companies, including “Wildlife.la” an famous American Agency.

I am currently seeking a new challenge, motivated to bring my skills and passion to a dynamic and innovative environment.

~ **if you don't have much time, give me 30s to convince you there :**

CAREER HIGHLIGHTS

→ Click on project titles to view detailed case studies.

Freelance Fullstack Developer | Wildlife.LA

Architected innovative AI-powered web experiences for high-profile AWS-based projects.

AI Orchestration: Designed complex AI chains and innovative web interfaces to showcase the potential of generative AI.

Stack: JS/TS Ecosystem (React/Next.js), TailwindCSS, AWS Services, AI engineering...

Lead Fullstack Developer | Neova Protocol (Web3 & Cloud)

Spearheaded the complete architectural overhaul of a decentralized ecosystem (30+ repositories).

Infrastructure & DevOps: Orchestrated a critical migration from Kubernetes to Coolify to increase deployment agility; implemented robust CI/CD pipelines and real-time monitoring (Uptime Kuma, Sentry).

Microservices Architecture: Refactored 15+ backend services and secured sensitive data by integrating Hashicorp Vault and Infisical for centralized secret management.

Decentralized Storage: Integrated IPFS clusters for secure, end-to-end encrypted file storage.

Stack: Next.js, TailwindCSS, NestJS, RabbitMQ, IPFS, PostgreSQL, Keycloak...

Outcome: Delivered a scalable, production-ready system in just 4 months with a lean 2-person development team.

Founder & Lead Developer | ForVoyez.com (AI SaaS)

Engineered and launched an AI-driven SEO automation platform in 30 days.

AI Integration: Leveraged OpenAI APIs to develop an automated computer vision engine for generating high-quality SEO metadata and image alt-text.

Fullstack Excellence: Developed a high-performance application using Next.js Server Actions and ensured 100% reliability with Vitest (Unit) and Playwright (E2E) testing.

Monetization: Implemented a full subscription lifecycle and secure checkout using LemonSqueezy.

Stack: Next.js, TailwindCSS, Prisma, Clerk, Docker, GitHub Actions...

Founder & Lead Developer | Beswib (Fintech & Marketplace)

Developed a high-trust C2C marketplace for the legal resale of sports bibs.

Cutting-edge Tech: Early implementation of Next.js 15 (App Router) and React 19 to ensure industry-leading performance and UX.

Fintech Integration: Navigated the complex PayPal Partner Program integration to manage secure C2C financial flows and automated payouts.

Internationalization: Built a dynamic i18n architecture supporting 9 languages with modular translation management.

Stack: Next.js, Pocketbase, BiomeJS, Valibot, TailwindCSS, Vitest...

Technical Instructor | EPSI Nantes

Designed and delivered advanced "Modern Javascript Frameworks" courses to IT students. (Bachelor of Science)

Mentorship: Mentored future developers on the React/Next.js ecosystem and industry best practices (DX, Testing, Clean Code).

EDUCATION

MASTER'S DEGREE in Expert Computer Development - (France)
EPSI - Computer Engineering School (France) 2022 - 2024
